

Twitter API to access Twitter content

- Study APIs

- See which one gives the functionality I need

- Download Library

- Study how to use it with examples

FF-MPEG to convert images to videos

- Understand how to convert images to videos

- Find a way to run FF-MPEG within my program

Google Vision analysis to describe the content

- Understand how to use the API

- What to pass & what to get

Error Control

Sprint 1 :

- Study the APIs

- Define the function of my module

- Implement a shell for my module where I call and pass information to dummy functions

Sprint 2 :

Implement the twitter module

3 :

Implement the FFMPEG module

4 :

Implement the vision module

## Project Outlines
